Teleradiology Technology Workflow

QA Process

ACR peer review process for QA reports

1

When Hospital/Diagnostic Centre raises a query to review

2

QA will review it and connects client with the respective reporting Radiologist

3

Report will be revised as soon as discussion done between Hospital/Centre and reporting Radiologist

4

QA will verify and make necessary corrections and release the report to client

BENEFITS

Reduce radiology department costs

High quality emergency & subspecialty reads

Accelerate Diagnosis with access to expertise

Adapt to future healthcare demand

Scalable Plug & Play AI integrated RIS PACS

www.uevolve.in
